

## Case Study

### Paul International Public Charter High School

---

#### **Opportunity**

Paul International Public Charter High School (Paul PCS) was approved to expand to a full high school from grades 6-10 and was in need of development of the 11<sup>th</sup> grade curricula for Pre-Calculus, English III, US History and Physics by summer of 2014. EDspired partnered with Paul PCS in May of 2014.

#### **Approach**

EDspired served as the Project Manager for the development of the 11<sup>th</sup> grade core curricula. This entire project was completed virtually by consultants who were located in different states.

EDspired:

- Established clear expectations of quality including rubrics and exemplars with the school leadership team comprised of the High School Principal and Executive Director
- Established expectations for timeline, deliverables, processes of the project with the consultant curriculum team
- Screened and recruited experienced content area curriculum writers
- Introduced the school leaders to an online curriculum management solution which they acquired with the intention of implementing with other grades moving forward
- Facilitated professional development for the curriculum team and administration on utilization of the curriculum management tool

#### **Outcome**

EDspired provided leadership to customize a solution for Paul PCS through access to content area experts and knowledge of a management system for efficient delivery. Within 6 weeks of initiating this project, curriculum maps, scope and sequence documents, performance tasks and assessments were developed for the incoming 11<sup>th</sup> grade class.

#### **Why It Matters**

The school now has a system they can replicate to develop the 12<sup>th</sup> grade curricula and to review curricula for existing grades using the online management tool and the processes put in place in collaboration with EDspired.
